

Binit Nayak

+91 9142212934 - Portfolio - binitnayak48@gmail.com - linkedin.com/in/binitnayak2002 - github.com/BINIT-Nayak

EDUCATION

Vellore Institute of Technology
B.Tech - Computer Science Engineering

Amaravati, AP, India
2020-24

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python

Frontend: React, Redux, CSS, HTML, Preact

Backend: Spring Boot, NodeJS, REST API Design, Authentication (JWT), API Integration

Databases: SQL, PostgreSQL, Redis, MongoDB, Database Design, Query Optimization

Core: Data Structures & Algorithms, Problem Solving

Systems: System Design, Distributed Systems, Event-Driven Architecture

Cloud & DevOps: AWS, Docker

WORK EXPERIENCE

SDE I

Arrise Solutions, Hyderabad, India

July, 2024 - Present

- Owned end-to-end design and deployment of a scalable notification service using event-driven architecture, **serving 100K+ daily active users** and reducing user-facing disruptions by 40% in real-time gaming systems.
- Developed and architected **12+ modular gameplay systems** (BetSpot, chip engine, animation pipelines) and **8+ real-time animations** across 4 layouts, reducing UI inconsistencies by 35% and improving gameplay responsiveness across mobile and desktop environments
- Refactored and modularized 50+ legacy components into reusable, maintainable abstractions, **reducing integration effort by 25%** and accelerating feature development across shared component libraries.

Software Intern

Arrise Solutions, Hyderabad, India

January, 2024 - June, 2024

- Designed and implemented the Free Chips feature by defining robust web service contracts and enabling low-latency data exchange across **5+ distributed systems**, ensuring seamless real-time gameplay integration.
- Collaborated and aligned with Product, QA, Backend, and Game Framework teams to define API contracts, validate request/response schemas, and achieve 95%+ merge acceptance rate through high-confidence, **production-ready releases**.
- Engineered and coded a lazy-loaded game history component with unit testing, **improving feature reliability**, reducing load time, and increasing player engagement.

PROJECTS

- Sneaky** [GitHub](#)
 - Built a swipe-based fashion discovery platform using React, Java SpringBoot, and PostgreSQL, handling 10K+ swipes/day with load-tested performance.
 - Reduced feed latency to less than 100ms using Redis caching and prefetching, improving user engagement by 40% with smooth 60fps UI rendering.
- Snapgram** [GitHub](#)
 - Developed a full-stack social media platform using React, TypeScript, Tailwind CSS, and Appwrite, supporting 500+ users with authentication and media sharing.
 - Implemented optimized data fetching with React Query (auto-caching, parallel queries), improving performance and enabling scalable handling of 1,000+ media uploads.

CERTIFICATES

- AWS Cloud Practitioner Essentials
- Meta Advanced React

EXTRACURRICULAR ACTIVITIES AND ACHIEVEMENTS

- Solved 350+ DSA leetcode problems.
- Secretary** in Utkal Club - July, 2022 - July, 2023
- Interests:** Chess, Piano, Badminton
